Website design

in

• < Website > [1]

[2]

This website was developed (and is maintained) by <u>In Petto</u> [3], using a content management system (CMS) named <u>Drupal</u> [4].

Apart from developing websites, In Petto also offers solutions and services such as:

- Internet security using <u>digital certificates</u> [5].
- Optimalize websites [6] in the context of moving up in the ranking in search engines such as google, etc.
- <u>Software escrow</u> [7], which is depositing source code of all sorts of software programs and which protects users of proprietary (compiled) software against a software vendor going out of business because of (e.g.) bankruptcy (a modern equivalent of what used to be done in the past via a traditional notary office using floppy disks and/or CD ROMs).

More infomation about such CMS [8] and/or about In Petto is available on the In Petto website [3].
